Subject: District Elections
Date: Monday, February 12, 2018 16:02:59

I can not attend the Tuesday meeting due to age and possible exposure to FLU. LOL

But, I would like you to consider closely the lack of need for district elections, when it may be possible to simply change the voting procedure to specify one vote can be cast for each position under consideration.

4 POSITIONS to be filled, means that each elector can cast 4 votes for the position. This will eliminate the possibility of a specific ethnicity being under-represented in the election procedure as the votes can all be cast for one candidate, or distributed to four different candidates.

A simple change to the ballots, makes the need for the redistricting go away, and saves the city lots of time and money.

And makes all voters equally considered in the procedure, allowing voters who are not in a specific area at a disadvantage or not being able to vote for the candidate they support who is not in their district.
