Subject: DISTRICT ELECTION MAPS
Date: Sunday, February 18, 2018 12:02:36

---

perhaps, ,You might think about the reasons that you are applying for district maps information to be provided to you for citizen's input

It really might be that the citizens don't want the district elections!

It might be that the public does not think that you will consider their input, basing their belief on your refusal to respond to public comments during the open sessions!

It might be that the don't believe you pay attention to their concerns!

It might be that they think that is all locked in stone at the present time!

It might be that they were never asked to approve the spending of so much money!

It might be that they have found out that the attorney said that there was little chance of the plaintiff's winning their case if file!d.

It might be that the citizens are losing trust in all government based upon the political infighting in the ranks!

And , finally, it might be that they are just depressed, angry, and not wanting to deal with things that they know will not be to their advantage in life, and that the city council doesn't really care about what they think, based upon the attitudes shown by the city council in the regular meetings.
You might want to consider why there are so few attendees at the city council meetings these days.
And wonder why the city council seldom responds to email suggestions
