**RE: CORRECTION TO THE SONOMA COUNTY WATER AGENCY 2017 ANNUAL WATER
QUALITY REPORT**

Enclosed is a correction to the Sonoma County Water Agency's *2017 Annual Water Quality Report*.

On April 27th one of our contractors pointed out that Lab results for Caisson 3 had a discrepancy in the Asbestos results specifically that the DLR was not met [i.e. < 0.4 MFL (which is not the DLR of 0.2 MFL)]. Immediately following this revelation, our Lab Coordinator Ellen Simm contacted our lab to see whether this was truly an exceedance or potentially a lab error. After further investigation it was shown to be a typo made for the filter area of the first sample in the original report. This has since been corrected and we have attached the amended version of the page pertaining to this error. Please replace page 3 with the attached correction. Please accept our apologies for any inconvenience. If you have any questions regarding this matter, please call either one of us.
