

JUMP STRUCTURE GUIDELINES

Standard Jump Structures (less than 15' x 15') are currently allowed in most Santa Rosa City Parks Picnic Sites with a Picnic Reservation. Large Jump Structures (more than 15' x 15') are only allowed in Santa Rosa City Parks in conjunction with a Park Permit. All companies/individuals providing inflatables and jump structures must comply with the following guidelines. Failure to comply will result in inflatables/jump structures being relocated or deflated completely.

1. **Vehicles are NOT allowed on walkways or lawn.** Standard Jump Structures must be transported to/from approved location via hand-trucks using main walkways. Large Jump Structures are subject to an approval process via the Park Permit desk.
2. **Jump structures are only permitted in pre-approved locations.** A map will be provided with the reservation/permit. Jump Structures set up in an undesignated area will be required to move.
3. **Do NOT set up a Jump Structure on wet lawn.** All reservations/permits will be notified of any field closure that will prevent the use of a Jump Structure. Any damage done to the lawn will be withheld from the deposit on file. To check daily field conditions, call: 707-543-3474
4. **Reduce the noise impact on neighbors and other park patrons** by ensuring generators and jump structures are set up at least 50-feet away from playgrounds, and 100-feet from residential property/fences. Please respect any signs prohibiting Jump Structures or generators in designated areas. Generators should be positioned to point away from nearby events/activities.
5. **Electricity is not provided in City Parks.** A generator must be used to inflate and run Jump Structures and must be placed on a plastic tarp for duration of use. Gas generators must be filled off-site.
6. **Do not drive stakes over 6" into the ground.** There may be buried electrical or irrigation lines that could be damaged.
7. **Water slides or dunk tanks are NOT permitted in any City Park.** Water faucets shall not be used for these structures.
8. **Charging money for use of a Jump Structure while in City Parks is not permitted.**
9. **Santa Rosa City parks are open from sunrise to sunset.** Smoking/vaping and glass are prohibited in all City Parks.
10. **General Liability Insurance** is required for all inflatables and jump structures operating in a City Park with a Park Permit. A list of companies with insurance on file can be provided.
