A bicycle is like a 2-wheeled car. Many of the rules of the road apply to cyclists as well as drivers.

**KEEP TO THE RIGHT**
Cyclists should ride in the same direction as traffic. The slowest traffic keeps farthest to the right. As a cyclist, you should stop at signs and signals, and yield to pedestrians.

**WEAR A HELMET**
Always wear a helmet while riding. Make sure that it fits and that you wear it properly.

**BE VISIBLE**
When it’s dark outside, make sure you can be seen. Wear light colored clothing and equip you bicycle with reflectors and lights if you ride in low light or at night.

**SIDEWALKS**
Riding your bicycle on a sidewalk is illegal in some areas. Riding in the street and obeying traffic laws can be safer than riding on a sidewalk.

**DRIVERS**
Most drivers are alert, but don’t assume they have seen you.
